L850

DATASHEET

Our first A4 6-colour ITS multifunction photo printer with an LCD screen, delivering low-cost and Epson-quality PC-less photo printing.

Easily print Epson-quality and low-cost photos from memory cards or directly from cameras using PictBridge with this A4 ITS photo printer. Ideal for photographers using these printers at events or in a studio, the L850 delivers reliable and high-quality photo printing together with more advanced functions such as a scanner, LCD display, and CD/DVD printing.

Ultra-low-cost photo printing

The L850 offers affordable printing and a low cost per print. Each set of ink bottles can print up to 1900 10x15cm photos[1], delivering an ultra-low cost per photo.

Easy to use and reliable

Increase productivity and reduce downtime with hassle-free set up and reliable printing. The purpose-built ink tank is fully integrated into the printer, so you can enjoy reliable colour printing without the mess or hassle often associated with non-genuine refills and third-party ink tank systems. Epson-genuine ink bottles make it easy to refill the ink tank with their clear labelling and drip-free nozzle. The L850 has 70ml ink tanks and comes with a 12 month (or 3,000 page) warranty, providing peace of mind and help should you need it. The 6.9cm LCD screen allows for easy and convenient printing and scanning without a PC.

Epson-quality printing

The L850 utilises genuine Epson ink and Epson's Micro Piezo technology to produce consistent-quality prints. Fast photo print speeds of approximately 12 seconds per 10x15cm photo[2] ensure that you won't be waiting around for print jobs.

1. Quoted yields are extrapolated based on Epson original methodology from the print simulation of Test Patterns provided in ISO/IEC 29103 with replacement sets of ink. Quoted yields are NOT based on ISO/IEC 29102. Quoted yields may vary depending on the images that you are printing, the paper type that you are using, the frequency of your prints and environmental conditions such as temperature. During the initial printer setup, a certain amount of ink is used to fill the print head's nozzles, therefore the yield of the initial bundled set can be lower.
