Introduction to Epson Projector Management

See the information here to learn more about Epson Projector Management software.

Related Links

• "Epson Projector Management Features" p.5

Epson Projector Management allows you to check the status of multiple networked projectors and perform various projector operations from your computer.

• Monitoring the status of projectors

You can visually check projector information such as power status, errors, and warnings so you are alerted to projector abnormalities immediately. You can also select individual projectors or projector groups to check detailed information such as the usage hours of the projector light source, the current input source, and any current errors or warnings.

• Controlling the projectors

You can turn projectors on or off, or change input sources for individual projectors or projector groups. You can schedule various projector events to occur automatically on the specified date and time.

• Sending email notification

You can set up the projector to send you an email alert over the network if there is a problem with the projector.

• Message Broadcasting

You can distribute images or text messages to multiple projectors for simultaneous display on those projectors.

• Monitoring and controlling non-Epson projectors using the PJLink protocol You can monitor and control projectors that support the PJLink protocol.

Setting Up the Software for the First Time

Follow these instructions before connecting a computer to the projector over a network.

Related Links

- "Installing the Software" p.7
- "Selecting Projector Network Settings" p.9

Check the system requirements necessary to run the software, and then install the software.

• If the language selected for the installation differs from the language of the operating system being used, the screens may not display correctly.

System Requirements

This application supports the following operating systems, and is compatible with computers that meet the following system requirements.

Operating Systems	Windows 7	
	• Ultimate (32- and 64-bit)	
	• Enterprise (32- and 64-bit)	
	• Professional (32- and 64-bit)	
	• Home Premium (32- and 64-bit)	
	• Home Basic (32-bit)	
	Windows 8.1	
	• Windows 8.1 (32- and 64-bit)	
	• Windows 8.1 Pro (32- and 64-bit)	
	• Windows 8.1 Enterprise (32- and 64-bit)	
	Windows 10	
	• Windows 10 Home (32- and 64-bit)	
	• Windows 10 Pro (32- and 64-bit)	
	• Windows 10 Enterprise (32- and 64-bit)	
CPU	Intel Core i5 or faster	
	(Intel Core i7 or faster recommended)	

Memory	2 GB or more
	(8 GB or more recommended)
Hard Disk Space	1 GB or more
Display	Resolution between 1280×800 (WXGA) and 1920×1200 (WUXGA)
	16-bit color or greater (approximately 32,000 display colors)

Installing Epson Projector Management

Download and install Epson Projector Management on your computer.

Visit http://www.epson.com to download the latest version of Epson Projector Management.

- You need administrator authority to install Epson Projector Management.
 - You need to install Microsoft .NET Framework 4.5 before installing Epson Projector Management.
- While installing Epson Projector Management, you may need to install other required software such as Microsoft SQL Server LocalDB 2014 Express. Follow the on-screen instructions to continue installation.

Download the latest version of Epson Projector Management.

2

Double-click **Epson Projector Management Ver.X.XX.exe** to start the installer.

Follow the on-screen instructions.

Importing Settings From EasyMP Monitor

You can transfer setting information from EasyMP Monitor (version 4.50 or later). Start Epson Projector Management on the same computer and the settings are imported automatically the first time you start the software. When finished, you see an message telling you that the settings are imported.

If you want to use the imported settings on another computer that is running Epson Projector Management, you can save a configuration file on the original computer using the **Save Configuration File** feature on the **Environment setup** screen. Then copy the resulting configuration file to the following directory on the other computer.

C:\ProgramData\SEIKO EPSON CORPORATION\Epson Projector Management

• "Environment Setup - General" p.41

Selecting Projector Network Settings

Follow these instructions to select a connection method between a computer and the projector, and then set up the projector.

Connect the projector to your network using the Advanced connection mode.

Related Links

- "Setting Up a Projector to Connect in Advanced Connection Mode (Wired)" p.9
- "Setting Up a Projector to Connect in Advanced Connection Mode (Wireless)" p.9

Setting Up a Projector to Connect in Advanced **Connection Mode (Wired)**

To connect a computer to the projector using a wired LAN, you need to select network settings on the computer and the projector.

Connect the computer to the network.

Connect a LAN cable to the projector.

Turn on the projector.

Press the [Menu] button on the remote control or the control panel, select the Network menu, and select Network Configuration.

6

Set **DHCP** to **Off** and enter the projector's IP Address, Subnet Mask, and Gateway Address values as necessary.

When you have finished making settings, select Setup Complete or **Complete**, and follow the on-screen instructions to save your settings and exit the menus.

Related Links

• "Solutions When You Cannot Connect Projectors Using Advanced Connection Mode (Wired)" p.30

Setting Up a Projector to Connect in Advanced **Connection Mode (Wireless)**

To connect a computer to the projector over a wireless LAN, you need to select network settings on the computer and the projector.

Contact your network administrator and write down the settings for the access point, such as the SSID and security settings.

Connect the computer to the network.

To set up a network connection, if necessary, see the documentation supplied with your computer or network adapter.

Install the wireless LAN unit in the projector, if necessary. See your projector *User's Guide* for instructions.

5

6

Turn on the projector.

Press the [Menu] button on the remote control or the control panel, select the **Network** menu, and then select **Network Configuration**.

Select Wireless LAN.

A screen like one of the following is displayed.

Turn on wireless LAN support.

The necessary settings vary depending on your projector. See your projector *User's Guide* for instructions.

Select Advanced for Connection Mode.

8

7

Select other options as necessary for your network. See your projector *User's Guide* for instructions.

Select security settings on the **Security** menu as necessary for your network. Check with your network administrator for more information on making the correct settings.

When you have finished making settings, select **Setup Complete** or **Complete**, and follow the on-screen instructions to save your settings and exit the menus.

Monitoring and Controlling the Projectors

Follow these instructions to monitor and control the registered projectors.

Related Links

- "Registering Projectors for Monitoring" p.12
- "Projector Monitoring Views" p.15
- "Projector Status Display" p.17
- "Projector Control Options" p.18

To monitor or control projectors, you must register the projectors to Epson Projector Management. Once you registered, the projector status is automatically displayed when you start Epson Projector Management.

If you need to register a large number of projectors, you can create projector groups so you can monitor and control the projectors in small units. First create your projector groups and then register each projector to a group.

You can register up to 2000 projectors and groups in total. To monitor a large number of projectors, make sure your computer meets or exceeds the system requirements.

- "Creating a Projector Group" p.13
- "System Requirements" p.7

Searching for Projectors

You can search for projectors on the same segment automatically, as well as searching for projectors by specifying an IP addresses.

Start Epson Projector Management.

- Windows 7: Click Start, select Programs (or All Programs), EPSON Projector, and then click Epson Projector Management Ver.X.XX.
- Windows 8.1: Navigate to the **Apps** screen and select **Epson Projector Management Ver.X.XX**.
- Windows 10: Select **Start**, select **EPSON Projector**, and then select **Epson Projector Management Ver.X.XX**.

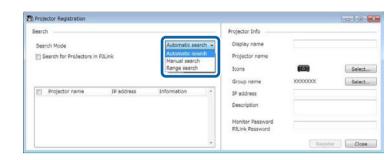

Epson Projector Management starts.

Select **Projector** from the menu bar and select **Projector Registration**. The Projector Registration screen appears.

Select a search mode.

- Select **Automatic search** to search for the projector on the same network.
- Select **Manual search** to search for the projector by specifying the IP address. Enter an **IP address**.
- Select **Range search** to search for the projector by setting an IP address range. Enter an IP address in **Start IP Address** and **End IP Address**.

If you want to search non-Epson projectors that support PJLink Class2 automatically, select **Search for Projectors in PJLink**.

Click Search.

You see a list of network projectors.

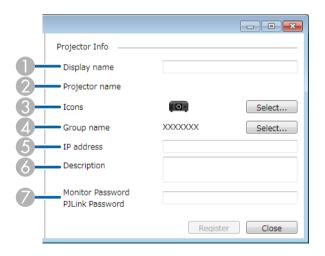

Select the projector that you want to register.

Search				Projector Info		
Sear	ch Mode		Automatic search	Display name		
Se Se	earch for ProJectors in	P3Link		Projector name		
			Search	Icons		Select
			2	Group name	XXXXXXXXX	Select
EI -	Projector name	IP address	Information	* IP address		
	200000000	200000000000000000000000000000000000000		Description

10	XXXXXXXXX	000000000000000000000000000000000000000		Monitor Password PJLink Password		

Select the necessary settings for each projector.

- Enter the name of the projector. This name is displayed in the Epson Projector Management main screen. You can enter up to 64 characters.
- ② Displays the name that has been registered to the projector.
- Select the icon.
- Select a group if you want to register the projector to a group. (You must first create a group to add projectors to it.)

- C Enter notes about the projector, such as its location, if necessary. Notes entered here are displayed in Projector Properties. You can enter up to 60 characters.
- If a password has been set for the projector, enter the password here. If you do not enter the correct password, you cannot monitor or control the projector, even after registering the projector. For more information about passwords, see your projector *User's Guide*.

Click Register.

To register additional projectors, repeat steps 5 to 7.

You see the registered projectors in the Epson Projector Management main screen.

- To change the projector information for a registered projector, double-click the projector in the Epson Projector Management main screen, and then change the necessary information on the **Projector Properties** screen.
- To remove a registered projector, right-click the projector in the Epson Projector Management main screen, and then select **Delete**.

• "Projector Properties - Information" p.36

Creating a Projector Group

Registering projectors to a group allows you to monitor and control multiple projectors all at once. When you select a parent group, you can also monitor and control all projectors included in multiple groups.

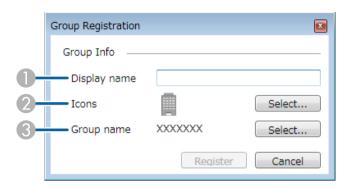

Select **Projector** from the menu bar and select **Group Registration**.

The Group Registration screen appears.

(5) Displays the projector's IP address.

Select the necessary settings.

- 1 Enter the name of the group. You can enter up to 64 characters.
- Select the icon.
- Select a parent group if you want to register a group to it. (You must create the parent group before you can add groups to it.)

3

Click Register.

You see the registered group in the Epson Projector Management main screen.

Double-click the projector icon that you want to register to the group.

Select the group to be registered, and then click **OK**.

Scheduling Projector Events

You can schedule events to occur automatically on your projector, such as turning the projector on or off or switching the input source. The projector performs the selected events on the specified date and time in the schedule you set up. You must also start Epson Projector Management on your computer at the scheduled time for the schedule events to occur.

-		_
	5	

Select Tool from the menu bar and select Schedule.

Select Schedule Settings.

	3

Select the projectors or groups for which you want to schedule an event.

If you schedule an event that requires the projector to be turned on, the projector turns on automatically, even if you do not specify a power-on event.

Select OK to complete setting. 6

The event schedule is saved.

Scheduling Projector Events

- To edit the event schedule, select the event in the **Schedule Settings** screen and select **Edit**.
- To remove a scheduled event, select the event in the **Schedule Settings** screen and select **Delete**.
- To enable or disable the scheduled event without removing the scheduled event from the list, select the event in the **Schedule Settings** screen and select **Enable/Disable**.
- To enable or disable all scheduled events, select **Tool** from the menu bar, select **Schedule**, and then select **Enable Schedule**/**Disable Schedule**.

Related Links

• "Projector Properties - Schedule" p.38

Making Security Settings

You can improve Epson Projector Management security by restricting access to the application and preventing anyone from changing its settings.

Related Links

- "Setting the Password" p.22
- "Restricting the Use of the Application" p.22

Setting the Password

You can set a password that must be entered when the application is started or when the application lock function is enabled.

Select **Tool** from the menu bar and select **Environment setup**.

Select the General tab.

Select Password.

Environment setup	×
General Monitor Display List Mail	
Application lock	Password
Register at startup	
Resident in the task tray	
Save Configuration File	Save
	OK Cancel

5

Do one of the following.

- Create a password for the first time: Leave the **Old password** field blank.
- Change an old password: Enter the existing password in the **Old password** field.
- Enter a new password in the **New password** field. The password can be up to 16 alphanumeric characters.
- Enter the same password again in the New password (confirm) field.

7 Click OK.

The password is saved.

Restricting the Use of the Application

You can lock the application functions so that they cannot be accessed by a third party.

When you set a password, you need to enter the password to release the application lock. Using a password improves the application security.

Open the Tool menu, and then select Application lock.

The application is locked and no operations are available except for opening and closing the application and disabling the application lock.

To unlock the application, open the **Tool** menu, and then select **Application unlock**. If no password has been set, you can leave these fields blank and just click **OK** in the window to enter the password.

Sending Email Notifications

You can set up Epson Projector Management to send you an email alert over the network if there is a problem with the projector. It can also send you a recovery notification email when the projector returns to normal status.

- If a critical problem causes a projector to shut down, you may not receive an email alert.
- The type of problems included in the email notification vary depending on your projector.

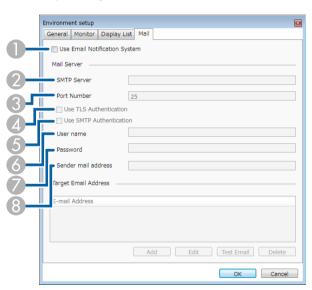

2

В

Select **Tool** from the menu bar and select **Environment setup**.

Select the Mail tab.

Select any necessary settings.

- Select to enable email notifications and allow you to enter the necessary information.
- Enter the SMTP server name or IP address for the projector's SMTP server.

- Select a number for the SMTP server port number using 1 to 65535. Default is 25.
- A Select to enable TLS authentication.
- 5 Select to enable SMTP authentication.
- 6 Enter a user name for the SMTP authentication.
- Enter a password for the SMTP authentication.
- 8 Enter the email address that you want to be identified as the sender. You can enter up to 512 alphanumeric characters.

Select **Add**, select the recipient's email addresses, and then select the type of email notifications you want them to receive.

5 Select OK.

The **Environment setup** screen appears. Repeat steps 4 to 5 to add recipient's email addresses. You can register up to 10 email addresses.

You can distribute images or text messages to multiple projectors for simultaneous display on those projectors. You can distribute the information immediately or at a specific date and time using the schedule feature.

- Make sure the image file resolution is between 50 \times 50 and 1920 \times 1200 pixels.

• Make sure the text is 1024 characters or less.

A Caution

You should not rely on the Message Broadcasting feature to send urgent messages in an emergency. Instead, use other methods for emergency notices. Epson does not guarantee the speed, reliability, or accuracy of messages sent using the feature, and Epson is not responsible for any loss, damage, or injury arising from its use.

Select the necessary settings.

- When you select **File**, select **Browse** to specify the file to be distributed.
- When you select **Folder**, select **Browse** to specify the folder that includes the files to be distributed. Specify an **Update interval** setting from 1 to 30 minutes for automatically switching display from one image to the next.
- When you select **Text**, enter the message in the text box and select any available style settings.

Select OK.

Repeat steps 3 to 5 to specify the date and time to finish message broadcasting.

Message Broadcasting

Select **End**, and then select **OK**.

If you do not specify the date and time for **End**, the projector projects distributed message continuously.

Select **Close** to save the schedule and message settings.

At the specified date and time, the images or text message you specified is projected by the selected projectors or groups.

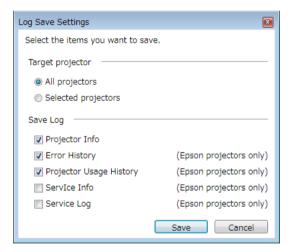

You can save selected information such as a projector's usage and error histories to a log file in a folder of your choosing. (Available only for Epson projectors.) The log file is saved as a separate zip file.

- Epson Projector Management saves log information for the last three months by default. You can change the log saving period from the **Log Save Settings** on the **Monitor** tab of the **Environment setup** screen.
- The type of logs saved by the Epson Projector Management varies depending on your projector models.

Select File from the menu bar and select Log Save Settings.

The Log Save Settings screen appears.

Select the target projector.

- Select All projectors to include all registered projectors.
- Select Selected projectors to include only the selected projectors.
- 3 Select the type of information you want to save in a log file, and then select **Save**.

Specify the output folder and file name, and then select **Save**. The zip file is created to the specified folder.

Solving Problems

See the following sections to check for solutions to problems you may have using Epson Projector Management.

Solutions When You Cannot Connect Projectors Using Advanced Connection Mode (Wired)

When you cannot connect the computer and the projector using Advanced Connection Mode over a wired network, try the following solutions. If you cannot resolve the problem, contact your network administrator.

- Check the status of the external devices used for the network connection or the environment in which the network devices and the projector are located.
- Connect the network cable securely.

• Use a commercially available 100BASE-TX or 10BASE-T LAN cable.

- To prevent malfunctions, use a category 5 or higher shielded LAN cable.
- Check the projector's network settings.
- Set **DHCP** to **Off**. When **DHCP** is set to **On**, it may take some time to enter LAN standby status if an available DHCP server is not found.
- Set the IP address, the subnet mask, and the gateway address for the projector correctly.
- Close network settings on the projector, and then return to the LAN standby screen.
- Check the computer's network settings.
- Enable LAN settings on your computer.
- Turn off the firewall. If you do not want to turn it off, register the firewall as an exception. Make the necessary settings to open the ports. The ports used by this software are "56181" (TCP).

 "Setting Up a Projector to Connect in Advanced Connection Mode (Wired)" p.9

Solutions When You Cannot Connect Projectors Using Advanced Connection Mode (Wireless)

When you cannot connect the computer and the projector using Advanced Connection Mode over a wireless network, try the following solutions. If you cannot resolve the problem, contact your network administrator.

- Check the status of the external devices used for the network connection or the environment in which the network devices and the projector are located.
- Connect the specified wireless LAN unit to the projector securely. See your projector *User's Guide* for more details.
- Check for any obstacles between the access point and the computer or projector, and change their position to improve communication. Sometimes, indoor environments prevent the projector from being found in a search.
- Make sure that the access point and the computer or projector are not too far apart. Move them closer together and try to connect again.
- Check for interference from other equipment, such as a Bluetooth device or microwave. Move the interfering device farther away or expand your wireless bandwidth.
- Set the radio strength for the network devices to the maximum.
- Set the IP address, the subnet mask, and the gateway address for the access point correctly.
- Make sure the wireless LAN system of the access point supports the projector's wireless LAN system.
- Check the projector's network settings.
- Set the Connection Mode setting to Advanced.
- Set the computer, the access point, and the projector to the same SSID.
- Set **DHCP** to **Off**. When **DHCP** is set to **On**, it may take some time to enter LAN standby status if an available DHCP server is not found.

Solving Network Connection Problems

- Set the IP address, the subnet mask, and the gateway address for the projector correctly.
- Turn on a wireless LAN.
- Set the wireless LAN system to meet the standards supported by the access point.
- When you enable the security setting, set the same passphrase to the access point, the computer, and the projector.
- Close network settings on the projector, and then return to the LAN standby screen.
- Check the computer's network settings.
- If the wireless LAN adapter is not installed on your computer, install a wireless LAN card on your computer.
- Enable the wireless LAN setting or AirPort on your computer.
- Connect to the access point to which the projector is connected.
- Turn off the firewall. If you do not want to turn it off, register the firewall as an exception. Make the necessary settings to open the ports. The ports used by this software are "56181" (TCP).
- Check the access point settings.
- Set connection permission at the access point to allow projectors to connect if any functions that block connections, such as MAC Address restrictions and port restrictions, are set to the access point.

- "Solutions When Network Alert Emails are not Received" p.32
- "Solutions When You Cannot Broadcast a Message" p.32

Solutions When You Cannot Monitor or Control the Projector

Try these solutions when you cannot monitor or control the projectors.

- Make sure the projector is turned on and connected to the network correctly.
- Set the **Standby Mode** setting to **Communication On** in the projector's menu so the network software can monitor the projector in standby mode.
- Make sure the projector you want to monitor or control is registered to Epson Projector Management.
- Turn off the DHCP settings for your projector. If you turn on the DHCP settings, the projector's IP address changes automatically and Epson Projector Management may not be able to search for the registered projector.
- When you restore settings from the backup file, extract the zip file and copy the extracted files to the following directory.

C:\ProgramData\SEIKO EPSON CORPORATION\Epson Projector Management

• If you need to reinstall the software but do not have a backup file, remove the file stored in the following directory, and then reinstall the software: C:\ProgramData\SEIKO EPSON CORPORATION\Epson Projector Management

Solutions When Network Alert Emails are not Received

If you do not receive an email alerting you to problems with a projector over the network, try the following solutions:

- Make sure the projector is turned on and connected to the network correctly. (If a critical problem causes a projector to shut down, you may not receive an email alert.)
- Set the **Standby Mode** setting to **Communication On** in the projector's menu so the network software can monitor the projector in standby mode.
- Make sure your electrical outlet or power source is functioning correctly.
- Select **Test Email** on the **Mail** tab of the **Environment setup** screen. If you do not receive the test email, check all of the settings on the **Mail** tab for accuracy.
- Related Links
- "Environment Setup Mail" p.43

Solutions When You Cannot Broadcast a Message

If the message broadcasting feature does not work, try the following solutions:

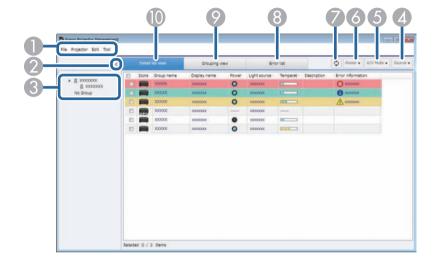

- Make sure the projector is turned on and connected to the network correctly.
- Set the **Standby Mode** setting to **Communication On** in the projector's menu so the network software can monitor the projector in standby mode.
- In your firewall settings, open the UDP port to allow Message Broadcasting to communicate through the required port. See your firewall software documentation for instructions.
- When you press the [Esc] button on the projector's control panel or remote control to discontinue message broadcasting, the message broadcasting feature is disabled. To distribute messages again, restart the projector.

Screen Summary

Uninstalling Epson Projector Management (Windows 7)

Follow the instructions below to uninstall Epson Projector Management.

You need administrator authority to uninstall the software.

Turn on your computer.

Make sure all running applications are closed.

- Click Start, and then click Control Panel.
- **2.** Click **Uninstall a program** from the **Programs** category.
- 5 Select Epson Projector Management, and then click Uninstall/Change.

Follow the on-screen instructions.

Uninstalling Epson Projector Management (Windows 8.1/Windows 10)

Follow the instructions below to uninstall Epson Projector Management.

You need administrator authority to uninstall the software.

Turn on your computer.

Make sure all running applications are closed.

Press the two on the keyboard to display all apps.

Right-click (press and hold) **Epson Projector Management Ver.X.XX**, and then select **Uninstall**.

Follow the on-screen instructions.

Limitations for Non-Epson Projectors

The following features are not available for non-Epson projectors.

- Automatic search (for PJLink Class1 projectors)
- Source button on the main screen
- Schedule
- Use Email Notification System
- Message Broadcasting
- Log Save Settings (except for Projector Info)

The following information cannot be acquired from non-Epson projectors.

- Light source hours used
- Constant Brightness Remains
- Temperature level
- Error History
- Usage History
- Status Information
- Service

Check these sections for important notices about your software.
